DETAILED ACTION

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Allowable Subject Matter

2. Claims 1-5, 9-13, 19, 21-24, 26-33, and 35 are allowed.

NOTE: Claims renumbered 1-24.

3. The following is an examiner's statement of reasons for allowance:

The prior art made of record {USP 6,040,771 (Kim), USP 5,815,557 (Larson), and USP 5,349,345 (Vanderschel)} does not teach a method of controlling a safe having open and closed states, said method comprising the steps of: providing an electronic lock for said safe through which a plurality of different types of transactions can be performed, including at least (a) currency processing and (b) changing of the state of the safe; providing a control unit external to said safe and coupled to said electronic lock for communication between the control unit and the electronic lock; said control unit monitoring said transactions with said electronic lock to allow a determination to be made through the control unit that a transaction has been performed; sending user identification information to the control unit to verify authority of a user to send signals to the electronic lock from the control unit; sending signals to said

Art Unit: 2635

electronic lock from said control unit after authority of a user to send signals from the control unit to the electronic lock has been verified; and controlling said safe remotely from the safe in response to said signals to perform the transactions without requiring intervention by a user of the safe at the safe, as claimed in claim 1. Claims 2-5, 9-13, 19, 21-24, and 25 are dependent on claim 1 and therefore allowable for the same reasons. Claim 27 recites an apparatus for practicing the method of claim 1 and therefore allowable for the same reasons. Claims 28-33 and 35 are dependent on claim 27 and therefore allowable for the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

USP 6,724,303 (McGunn et al) is cited in that it teaches of a method and apparatus for monitoring a safe {see whole document}. It is commonly owned and the claims do not read on the claims of the instant invention.

USP 5,725,081 (Meeker) is cited in that it teaches of a digital deposit and dispensing safe {see whole document}.
